## Break The Rules

Let's face it. Times are tough. Never mind the economic crisis and global warming - it's hard enough just covering day to day business expenses. Where are you supposed to find the extra cash for something like a website? Well, mean those web developer guys charge a *fortune*! Wouldn't it be great if someone just gave it to you for **FREE**?

***That's exactly what we'd like to offer you today***

For years we've been developing software to help get our customers online - a system which allows you to get online ***yourself at no cost***. The process is ridiculously easy and goes something like this:

**Step 1. Complete the registration form below**

**Step 2. There is no step two**

Once you've registered, you can choose from our collection of stock themes, customise them with your banner, preferred fonts, create as many web pages as you like, setup mailing lists and email accounts and even install an online store and accounting software if you want to get into e-commerce. It's all about as difficult as putting a hat on and you'll be out of pocket a grand total of \$0. In fact, all you ever need pay is the server rental fees which start from **as little as \$5.95/month**.

**Honestly, if there is a better deal around we'd like to know**

If you would prefer to pay somebody thousands of dollars to waste your time and fill your head full of meaningless jargon, please go ahead! However, if you want a system that puts you in control, gives you enormous flexibility and is ridiculously good value, then **register for your free trial below!**
