Celebrating 500 Days Uptime

By [Sunburnt Technology](#), 20 April 2014

Happy Easter to all! This Easter we are happy to report that our Internet Marketing Platform has reached 500 days of consecutive uptime. That's right - our main server has been slaving away in a busy data center, serving you and your customers for over 500 days without a break. That's why I love technology.

Over the last few years we've been working hard to improve the reliability and response times of our platform although the work has paid off already we continue to add more monitors, tests and checks for our software hardware to ensure that our service is available when you need it the most.

So we hope you had a nice Easter break. If you missed the holiday, don't feel bad. Our software was working whole weekend too.

About Sunburnt Technology

Sunburnt Technology has been helping businesses reach customers around the world since 2003. Our integrated Internet Business Platform includes [SEO Tools](#), Web Analytics, [Content Management](#), [Website Designer](#), [Email Marketing](#), [Online Store](#), [Domain Name Management](#) and more.
