## How To Create A Custom Banner

By Sunburnt Technology, 4 March 2015

Your banner the first point for branding your design and making it your own. Our designer takes a simple approach to your banner by letting you combine an image with text and giving you some basic positioning options.

While you can choose one of our stock banner images and lay your company name over the top, we expect

most people will want to use their own custom banner which includes their company name, logo and accompanying images. Here is how to customise your design with your own banner.

Your banner is a single image file which you can create using Photoshop or any other graphics program. If y don't have a graphics program you can install <u>The GIMP</u>, which is free software with functionality similar to Photoshop.

Once you have your banner image prepared, all that remains is to attach it to your design. To do this take th following steps:

1. Select the design you want to edit under 'Designer -> All Designs'

🎇 Sunburnt			≡ CONTACTS	$\equiv$ SALES	
	VIEW WEBSITE	+NEW DESIGN	ALL DESIGNS		

2. Open the 'Banner' panel on the right and click 'Custom Banner'.
