New Global Monitoring Locations

29 September 2011

For your information, we have added four new global monitoring locations to ensure your website is available around the clock around the world.

These locations are:

- Lisbon, Portugal
- Dusseldorf, Germany
- San Jose, CA
- Phoenix, AZ

This brings our total number of global monitoring locations to 36 and has helped us achieve an uptime of 99.99% over the last three months. Most of that 0.02% time unavailability has been due to the deployment of upgrades.

Our monitoring systems have improved drastically this year and are helping us make our service much faster and more reliable. Ultimately, we hope you don't notice. It should just work.
