New Website Designer Changes Everything

21 May 2012
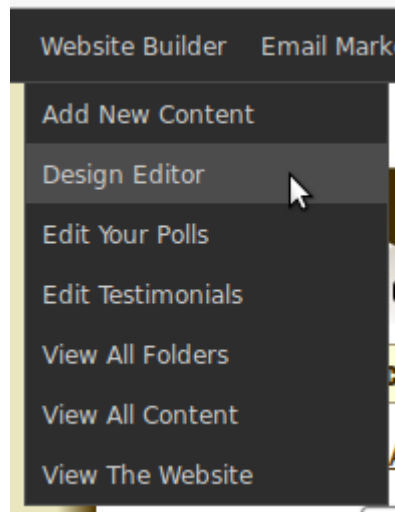

Sunburnt SEO is proud to announce that our new Design Editor is now online and it lets you change every a of your website and email designs including fonts, colours, layout, banners, page width, decorations and mo

While our old designer let you customise your banner and a few other options, the new designer changes everything by .. well. .. letting you change everything!

- Choose your fonts, colours and line spacing.

- Preview your design live after every style change.

- Create custom banners or select from our stock banners.

- Change the position of your banner, menu, and sidebar(s).

- Change the size of your page, banner and sidebar(s).

- Select a horizontal or vertical style menu.

- Choose between fixed with and fluid (percentage) layouts.

- Create custom backgrounds or select from our stock backgrounds.

- Create as many designs as you want.

- Apply different designs to different sections of your website.

- Add CSS for advanced fine-grained control of your designs.

The new designer lets you create, edit and save any number of different designs which you can then apply t different sections of your website.

To use the new designer, you go to the "Website Builder" menu and select "Design Editor".
