Free Daily Backups of Your Website and Email

24 March 2011

SEO Web Marketing is happy to announce that we have upgraded our backup services and are now running backups of your website, emails and other data. The backup service is free and already included in your monthly subscription.

We have also implemented a new monitoring system with alerts to ensure server problems are dealt with before they become critical.

These features have been added as a part of our effort to improve our service and reliability for you, our customers. After reliability, our focus is on improving our statistics and reporting to help you gain insight into how your website is performing in search engines.

We also know many of you are missing out on sales and traffic you could easily attract with a few simple tweaks to your website. As such, we have a detailed website checklist coming soon to make sure you don't miss out on opportunities for sales.

Best wishes,

SEO Web Marketing
