Sunburnt Dips Their Cap to You

By [Roger Keays](#), 19 March 2009

Dear current and future Sunburnt customers,

This is just a quick email to let you know we've **lowered the cap** for your monthly server rental. Use as much bandwidth, send as many emails, add as many web pages, invite as many users and update your site as often you like, and the most you'll ever pay is now just **\$25.95** per month. Of course this price only applies to our heaviest users, our lightest users pay only **\$5.95** per month and average usage remains at **\$15.95** per month.

Don't forget to take advantage of our [free support forum](#) and our growing [collection of video tutorials](#) if you have any questions!

Roger
