Updated Help Center

By [Roger Keays](#), 19 November 2012

We've been busy updating our Help Center so you can take better advantage of the features of our powerful software. If you login today, you'll see the new Help Menu at the top of the page on the right:

The menu shows help topics relevant to whatever you're currently doing and also has links to the help index, our blog, news and contact pages so everything is right at your fingertips. Select a help topic and it pops up in front of the current page so you can read it easily and then continue what you were doing.

The screenshot shows the Sunburnt CMS interface. The main content area displays a blog article titled "How To Write Better Blogs" with a share button and a search bar. The article text discusses the benefits of blogging and includes a line graph titled "www.ninthavenue.com.au traffic" showing traffic trends over time.

There is also a search feature you can use if you find that more useful:

Results

blog
