Colors		
Hover		
Shadow		10 px

Update

Content

Headings	Arial	
Links		Underline
Hover		Underline
Spacing	170 %	
Padding	20 px	
Footer		

Update

Sidebars

|		
Sidebar 1	Right Inse	30 %
Sidebar 2	Hidden	25 %

Update

I spent all weekend editing designs and the new organisation makes editing really fast! Here's a design I bui for this email.

Not bad for 5 minutes work.

Don't forget you can also use your designs for your **emails** and **newsletters** since everything goes through
website. You can also use **different designs for different folders** if you want to clearly demark the section
your website. Or maybe you just have some special content or a **landing page** that you want to have it's ve
design. You can do that too.

When you edit your pages and folders you'll see the option to change the design on the right.

More great features coming soon!

Roger
