What Is Linking Domains?

23 August 2012

Linking Domains counts how many **unique domains** have **one or more links** to your website. Linking dom is an important metric because it shows how widely connected a website is. 1000 backlinks from 1000 differ domains gives a site much more authority than 1000 backlinks all from the same domain.

We use data from the **Majestic SEO** backlink database to report the linking domains metrics in our SEO To
